

# Soundset for novation PEAK

Thank you for purchasing the Soundset for Novation Peak analogue/digital hybrid synthesiser. The soundbank contains a massive and rich set of patches ready for use in any genre of professional electronic music production, like chill, ambient, house, dance, trance and progressive. On top of the two animate buttons, every patch has modulation wheel assigned and almost all of the patches are velocity sensitive too.

It is necessary to update your Peak's firmware to version 1.2.

If you have any question regarding this soundset, don't hesitate to contact me and to send an e-mail to:
